Post-doctoral Fellowship
Mechanisms of toxicity and pathology spreading in neurodegenerative diseases

Laboratory of Molecular and Chemical Biology of Neurodegeneration
Swiss Federal Institute of Technology Lausanne
Lausanne, Switzerland
http://lashuel-lab.epfl.ch/

Date: January 3rd, 2017

A post-doctoral position in Molecular/cellular Neurobiology is available immediately in the Laboratory of Molecular and Chemical Biology of Neurodegeneration (http://lashuel-lab.epfl.ch/) at the Swiss Federal Institute of Technology in Lausanne (EPFL), Switzerland (www.epfl.ch). The selected candidates will work on projects aimed at elucidating the molecular determinants and cellular pathways that trigger and regulate protein misfolding, aggregation, and propagation in cellular and animal models of neurodegenerative diseases.

The desired applicant must have a Ph.D. degree and strong experience and track record of accomplishment in the development and characterization of animal models of neurodegeneration and neurological disorders.

We are looking for highly motivated individuals to work as members of an interdisciplinary group working at the interface of chemistry and biology in collaboration with world-renowned research groups at the frontiers of neuroscience and brain research. Very good writing and communication skills are important, and the ability to be a team player and interact with several groups is a must.

The qualified candidate will benefit from working with a very dynamic and multidisciplinary group in a highly collaborative and stimulating environment and access to state of the art laboratories and core-facilities and a competitive salary.

For more information about our group, please visit our website and review our recent publications at http://www.ncbi.nlm.nih.gov/pubmed/?term=Lashuel
