Post-doctoral Fellowships in Mass Spectrometry and Biomarkers Discovery

Laboratory of Molecular and Chemical Biology of Neurodegeneration
Swiss Federal Institute of Technology Lausanne
Lausanne, Switzerland

April 10th, 2018

Two post-doctoral positions in the field of Mass Spectrometry, proteomics and Biomarker Discovery is available immediately in the Laboratory of Chemical Molecular Biology of Neurodegeneration (http://lashuel-lab.epfl.ch/) at the Swiss Federal Institute of Technology in Lausanne (EPFL), Switzerland (www.epfl.ch). The applicant must have a Ph.D. degree in Biochemistry or Chemistry with a strong publication record and demonstrated experience in the following areas; targeted and quantitative mass spectrometry using LC-MS/MS and triple quadrupole MS systems, immunoprecipitation (IP), as well as conventional biochemical techniques for the analysis of human samples including plasma, CSF and/or brain tissues. Additional experience in protein biochemistry is a plus.

The qualified candidate will benefit from working in very dynamic and multidisciplinary group in a highly collaborative and stimulating environment and will have access to state of the art laboratories and core-facilities and a competitive salary.

For more information about our group, please visit our website and review our recent publications at http://www.ncbi.nlm.nih.gov/pubmed/?term=Lashuel

To learn more about our research activities in the fields of mass spectrometry and biomarker discovery, please visit https://lashuel-lab.epfl.ch/page-146105-en.html
